SEASON 1921

IN spite of the difficulty of maintaining stocks of the exceptionally high quality of seeds our trade demands, and the upward tending of prices, we increased our list of customers last year by several thousands, and are now in a better position than ever to supply high-grade seeds for both private and market gardeners. We have contracts with growers not only in Australia and New Zealand, but in all parts of the world, where seeds are grown to perfection, and our stocks can safely be said to be the best the world produces.

On account of the enormous cost of printing, we have decided to condense our catalogue this year, giving less description, but fuller prices. Customers who have our Silver Anniversary Catalogue should keep it for reference on account of the fuller descriptions. We still have a few thousand of these catalogues for new customers, and those who have mislaid their copies.

PRICES.—On account of the fluctuation of prices, it is not always possible to fix prices for a year in advance; but as far as possible we adhere to our catalogue quotations for ounces and pounds.

When we started the seed business, 26 years ago, the minimum price of packets of vegetable seed was sixpence; a few years later it was reduced to threepence; right through the war we adhered to this price, hoping that things would soon be normal, but as all costs have continued to go upwards, particularly labour and printing, we have reluctantly decided to entirely drop the threepenny packets of vegetable seeds.

CONDITIONS OF SALE.—We believe that all Seeds, Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this we give no undertaking that such Seeds, Bulbs or Roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We further give no warranty, express or implied, as to their growth, description, quality, or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms they are at once to be returned to us.

TREES AND PLANTS.

There has never been as great a scarcity of fruit trees as there is this year, and our customers would do well to have their requirements booked early, so as to secure the varieties they wish for. It is not necessary to send the money with the order, if ordered before June, as we shall send out invoices before sending the trees.

Our stocks of Ornamental Trees are large, and of good growth. Customers who wish to beautify their home surroundings will not fail to include with their order some suitable Ornamental Trees or Shrubs.

NO SEED POTATOES OR FARM SEEDS.

We confine our attention to Vegetable and Flower Garden Seeds, and do not stock the more bulky lines of Farm and Agricultural Seeds, or Seed Potatoes. At the same time, when our customers feel it more convenient to send us their order for these lines we obtain them at the lowest current rates for good stock.

New Hybrid Tree Lupin

PINK PEARL.

When his Royal Highness the Prince of Wales visited Sydney in June, 1920, the florists who had to supply the table decorations at the ball room supper in the Town Hall, had a difficult task to undertake. Of course, Sydney is never without flowers of some sort, but June is about the most difficult month to get anything really striking in quantity.

Pink Pearl Lupin, however, proved the solution of the difficulty, for these new hybrids were just at their best from seed sown the previous February. Every plant had a giant spike of flowers on it, about 14 inches long, and the stems could be cut to a length of from eighteen to twenty inches without injuring the plant. With seventeen dozen of these immense spikes, the difficulty was overcome. The graceful beauty and fragrance of the massive spikes of flowers were freely discussed by the guests, and the decorations were pronounced a marked success.

For the rest of the season, Pink Pearl Lupins were in demand for every occasion where flowers were required. Every plant that had supplied one terminal spike set to work and branched out to a diameter of three feet and a height of three to four feet, and unfolded from thirty to fifty more spikes of the wonderful blooms.

At the end of October, many of the plants were still loaded with spikes of blooms, not as fine as the earlier flowers, certainly, as the plants were allowed to exhaust themselves in ripening a huge crop of seed, but still very fine in their diminished beauty.

PINK PEARL blossoms are, as their name implies, a beautiful shell pink in general effect. The upper lobes are a lighter pink touched with a spot of bright yellow. The substance of the flowers is of a fine consistency, and if the spikes are placed in water when the first blossoms open out, they will keep fresh for a week or ten days while all the buds expand.

Another curious habit the spikes have is that of turning upwards after a few hours in water, frequently bending in the middle of the spike, so that the top part shall be perpendicular.

Altogether, the Pink Pearl Lupin forms the most satisfactory cut flower for winter use that has been introduced for many a day. Nor should it be inferred from the fact that they have done so well in winter from autumn sown seed that this is the only season for sowing and flowers. These Lupins may be sown from December to August in the warmer and coastal districts, and from January to October in the cooler highlands with satisfactory results, though the February to March sowings will probably produce the largest and most prolific plants.

Good rich soil is not essential for Lupins, but like most leguminous plants, they do much better for a dressing of lime before planting. Where fresh wood ashes are available, these will be found very suitable as they usually contain lime in small quantities.

It should not be forgotten either that a crop of Lupins is as good for the soil as a heavy dressing of manure, as like other leguminous plants, their roots are covered with nodules which are inhabited by a species of bacteria, which have the power of extracting the nitrogen from the air, and in their decay, leaving it as a plant food for their successors.

We have large stocks of seed, but we anticipate such a demand for it that we recommend early ordering.

Price One Shilling per packet, post paid. Special prices for quantities, for florists, and the trade.

HERBERT J. RUMSEY, Seed and Plant Merchant,
Adderton Road, Dundas, N.S.W.

Alterations in Prices

Plants and Roots (Page 10, Silver Anniversary Catalogue).

ASPARAGUS.—Seedlings, 1/6 per dozen; 7/6 per 100. Two year plants, 2/- per dozen; 12/6 per 100.

CABBAGE, CAULIFLOWER, BROCCOLI, BRUSSELS SPROUTS, CELERY, LETTUCE and ONIONS.—2/- per 100; postage, 1/- per 100 extra

TOMATOES, CAPE GOOSEBERRY
and **PEPPERS**.—1/- dozen, 6/- per
100; postage 3d. per dozen, 1/- per
100 extra.

HORSE-RADISH.—6d. each, 4/6 per dozen, post paid.

PARSLEY.—2/6 per dozen, postage,
6d. extra.

SWEET POTATOES.—1/- per dozen,
7/6 per 100; postage, 3d. doz., 1/-
per 100 extra.

RHUBARB.—Winter seedlings, 1/- dozen, 1/6 post paid.
Large roots in spring, 4/- to 6/- per dozen; postage, 2/- doz. extra.

RHUBARB.—Summer seedlings, 1/6 dozen, post paid.
Large roots, 6d. each, 5/- dozen; postage, 2/6 dozen extra.

Flowering Shrubs

ROSES.—Dwarf and climbing, 1/6 each, 16/- per dozen.
Imported novelties, 4/- each.
1920 novelties, 2/6 each.
Collection of 14 roses, post paid for £1.

Minor Corrections and Amendments for Silver Anniversary Catalogue

PAGE 11.

We have a large stock both of Dasheens and Taro for distribution this year at 1/- each, post paid.

Our new stock of Alpine strawberry seed usually comes from France about February, and should be sown as soon as possible after that.

PAGE 21.

Gladiolus, Fordhook Hybrids.

MISPRINT. Price 1000 should be
£8, not £3 as printed.
PAGE 24.

Flower Garden Seedlings

The flower garden seedlings for spring and summer or autumn and winter planting have been altered in price. Varieties priced in our Silver Anniversary catalogue at 8d. are now 1/- per dozen. Those at 1/- remain, with the exception of Hollyhock, Marguerite Carnation, Nemesis and Verbena, which are now 1/6 per dozen. Special lines at 2/- are now 3/- per dozen. All prices post extra.

The best value in flower seedlings is to order our special seasonable collection for 5/- or 10/- post paid.

Palms

There has been a slight change in the price of palms, Brahea and Seaforthia being raised to 2/6 each.

Edging Plants

The only change in these is that Alternanthera, Jewell is 2/6 per doz. 17/6 per 100, and Pyrethrum Aur-
eum is now 6/- per 100, both post
extra.

Pink Pearl Lupin

Every customer should include a packet of this magnificent Lupin in his or her order. This is the flower that made such a hit for table decorations in June last at the time of the Prince's visit. It is valuable not only from its own intrinsic beauty, but from the fact that it flowers at the time that no other flowers are available.

HERBERT J. RUMSEY, Adderton Road, Dundas, N.S.W.

Banana Passion Fruit

Tacsonia Mollissima.

Plants of this new popular variety are obtainable the year round. The fruit is more elongated than the ordinary passion, and has a creamy white skin. Many prefer it to the ordinary passion for making fruit salads. At it is hardier than the common passion, it may be satisfactorily planted in localities too cold for that to fruit satisfactorily. Price 1/- each; post paid, 1/6; 3 for 3/6.

Mammoth Passion Fruit

This must not be confused with the so-called Mexican passion fruit. The Mammoth is a strain of the ordinary passion fruit, producing fruit double the ordinary size. This variety was raised in South Australia, and has been under observation there for about four years. It is not only a large fruit, but very prolific, and is reported to be a winter cropper as well. If this strain does as well in New South Wales as it has done around Adelaide, it is destined to replace the common passion altogether.

Price, 2/6 each; 25/- per dozen, post paid.

Common Passion Fruit

Our strain of passion fruit has been well tried, and has proved a money-maker to many growers. We have plants available all the year round at 9d. each; post paid, 1/3; 3 for 2/9. Special quotations given for hundred and thousand lots.

Trees and Shrubs

There has been a slight alteration in some cases in the price of ornamental trees and shrubs. Prices will be given on application.

Fruit Trees

PRICES FOR 1921.

The available supply of trees for this season is so small, and the overhead nursery costs so great, that prices will be higher than usual, as follows:—

Common oranges and lemons, 2/6 each; 27/6 dozen.

Navels, Mandarins, and Novelties, 3/- each; 30/- dozen.

Apples, Peaches, Nectarines, Apricot, Pears, Quinces, Guavas, Figs, Almonds, Plums, 2/- each; 22/- doz.

Cherries, Persimmons and Loquats, 2/6 each; 27/6 dozen.

Special quotes for larger quantities.

Collection of Fruit Trees

16 Assorted Trees, "Farmer and Settler" collection, post paid for 35/-, or to other States, 37/6.

Logan Berries

The wonderful success made by this berry has led plants to being offered at fancy prices under other names. Logan Berries are good enough for any small fruit growers; there is nothing better on the market. Price 1/- each, 11/- dozen. £3/10/- per hundred. Postage, 2/- per dozen extra.

Strawberry Plant Prices

Standard varieties, 7/6 per 100, freight extra; 10/- post paid.

Recent introductions, 4/6 per dozen; £1 per 100, 5/- per dozen, 22/6 per 100, post paid.

New Varieties, 1/- each, 9/- per dozen, post paid.
